

SCREENS

David Moss manufactures a wide range of Screening Systems, heavy duty rubber wear parts, liner blocks and skirt liners. Screening systems are available in our standard 305mm x 305mm modular panels with aperture sizes of 15mm to 65mm.

Our "Low Stretch" cross tension rubber screening mats are made from premium grade raw material, reinforced with hi tensile fabrics. Screening mats range in thickness from 4mm to 150mm with apertures from 4mm upwards. Apertures come in round, square, rectangular, oval, hexagonal tear drop and slotted ensuring all material types are catered for.

David Moss Corporation

Is an Australian based manufacturer and supplier of Poly & PVC Pipes & Fittings, Underground Ventilation Systems and Rubber Screening products, supplying Australian and International markets

WE MAKE IT

WE WELD IT

WE TEST IT

WE PROVIDE TRAINING

Damos "Low Stretch" screen mats are designed for use in all types of vibrating screens eg; Scalping, secondary and tertiary screen systems and also for trommel applications.

At David Moss we specialise in tailoring products to meet all your specific screening application requirements, including specialised ceramic Impregnated heavy duty wear plates and 500mm x 500mm panels using 6mm ceramic and a range of rubber thickness of 4, 6 or 8mm as standard.
